 **Adequan Canine®**
polysulfated glycosaminoglycan

Treat arthritis, not just the symptoms

Adequan® Canine (polysulfated glycosaminoglycan) is different than other treatment options because it's the only FDA-approved arthritis drug that has been shown to relieve pain associated with inflammation, reduce cartilage deterioration and slow down the disease in a dog's joints.¹

Adequan Canine offers proven relief and reliable protection that can help to:¹

RESTORE

joint lubrication

RELIEVE

inflammation

RENEW

*the building blocks
of healthy cartilage*

The specific mechanism of action of Adequan® in canine joints is not known.¹

Ask your veterinarian if Adequan Canine is right for your dog.

Adequan® Canine polysulfated glycosaminoglycan (PSGAG) solution 100 mg/mL

Indications and Usage

Adequan® Canine is recommended for intramuscular injection for the control of signs associated with non-infectious degenerative and/or traumatic arthritis of canine synovial joints.

IMPORTANT SAFETY INFORMATION

Adequan® Canine should not be used in dogs who are hypersensitive to PSGAG or who have a known or suspected bleeding disorder. It should be used with caution in dogs with renal or hepatic impairment. Adverse reactions in clinical studies (transient pain at injection site, transient diarrhea, and abnormal bleeding) were mild and self-limiting. In post approval experience, death has been reported in some cases; vomiting, anorexia, depression/lethargy and diarrhea have also been reported. The safe use of PSGAG in breeding, pregnant or lactating dogs has not been evaluated. **CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian. For additional safety information, please see full prescribing information at adequancanine.com
